

KENT FORTICH

WEB DEVELOPER

PROFILE

As a beginner web developer knowledgeable in creating basic MERN stack application, as well as using Framer Motion and Tailwind css, I am passionate about developing dynamic and responsive web applications. My strong foundation in front-end technologies, including HTML, CSS, and JavaScript, allows me to create visually stunning user interfaces. I am eager to expand my knowledge in back-end development and stay up-to-date with the latest web development trends and technologies. Working collaboratively in a dynamic team environment, I bring value through my skills in the MERN stack, Framer Motion, and Tailwind, which enable me to create innovative and engaging web experiences.
